The catalogue presented here offers a survey of all the available literature on the distribution of Irish spiders. The species names have been up-dated to take account of recent taxonomic and nomenclatural work but it has not been possible to check the validity of the records themselves, because the original material has not been re-examined. It is hoped that this catalogue will enable future students of the Irish spider fauna to find and use the sources of data on distribution and ecology and that it will thus support progress in Irish spider faunistics.

HISTORY UP TO 1940

The spider fauna of Ireland has been studied by many arachnologists, some of whom have compiled lists or catalogues. The first list of Irish spiders was provided by T. Workman (1880a, 1880b). He summarized data from the literature and his own fieldwork which resulted in a list comprising 111 species (three of which have since disappeared into synonymy). It was the first time that Ireland was dealt with as a separate biogeographic entity. Usually it had been treated as part of the British Isles, reflecting British history, and for common species one provided statements such as "universally distributed throughout the United Kingdom" or "found everywhere on the British Isles" (Blackwall 1861-1864, and others).

Apparently Workman's list stimulated further research. Only 18 years later G.H. Carpenter (1898) produced a list of 222 species of Irish spiders (two of which subsequently were recognized as synonyms), which meant a doubling of the number of species.

D.R. Pack-Beresford (1909, 1929) produced two supplements to Carpenter's list and incorporated nomenclatorial changes and corrections of earlier identifications. With his 1929 list the number of recognized Irish spider species, some imported and not truly indigenous species included, had risen with another 98 to 320 (two of which have subsequently been recognized as synonyms).

W.S. Bristowe, in his *The comity of spiders* (1939), listed the distribution the British spider species by county within each of the main administrative regions of Great Britain, Ireland (Ulster inclusive) being one of them. For Ireland he mentioned 318 species (one of which is now a synonym). Although he did not explicitly say so, I assume his list to be a summary of all earlier records from the literature, supplemented with numerous records collected by himself.

HISTORY FROM 1950 ONWARDS

For several decades the two volumes of British spiders by Locket and Millidge (1951, 1953) served as the main modern treatise on the distribution of spiders in (again) 'The British Isles'. Incidentally Ireland is mentioned under the heading "Occurrence", but only in the third volume (1974) P. Merrett incorporated distribution maps for all species then known to occur in Ireland, again scoring mostly by county and exceptionally by a more precise locality. Some of those localities were mentioned in an earlier chapter on additions and corrections of distributional records, and thus one can sometimes trace the exact localities, but in many cases one has to consult the earlier literature in order to get the relevant original data. This process is now facilitated by the present

catalogue. The same holds for the remaining faunistic literature before and after Locket *et al.* (1974): some authors have mentioned names of sites and even indicated grid references, others, in particular Merrett himself (1964-1989), only indicated the county in which the species had been found. All together 340 species (two of which were synonymized with others in due course) were mentioned for Ireland, which is but a modest increase since Bristowe's list.

Late in 1993 a new checklist was published by McFerran and Ross. Apart from seven species having been omitted the list is no more than a checklist, as indeed indicated in the title. All species listed occur in Ireland, but more precise biogeographic information has not been included. The list appears to be based on many different literature sources, from the 1898 list by Carpenter onwards, including also some grey literature such as unpublished reports. Species seen by the first author and stored in the Ulster Museum have been marked in the list. For anyone who wants to study the distribution and ecology of spiders in Ireland such a checklist does not offer much help to find one's way through the existing extensive literature.

MAPPING AND RECORDING

In Locket *et al.* (1974) apparently records have been added on the distribution maps which cannot be traced in the literature. I consider those to be new records. On the other hand, in several instances old records have been left out without any textual explanation. Those I have regarded as omissions rather than corrections, and I have included these presumably omitted original data in the overall distribution for each species. Equally confusing are the discrepancies between original data and the way these records were finally included by Merrett in his updatings of the distribution maps, as is shown in the following example. D.G. Cowden, P.T. Harding and B.C. Eversham explored Northern Ireland in 1988 and collected, among others, spiders. The records of the spiders were supplied to P. Merrett to be used in his central record system of the distribution of spiders on the British Isles. While the publication by Cowden *et al.* was seriously delayed (to 1990), P. Merrett published most records in 1989. New county records of Cowden *et al.* thus had lost their currency when finally published in 1990. Strange enough the counties recorded in the two papers for a number of species differ. I follow Cowden *et al.* and consider Merrett's deviations to be misinterpretations of the notes supplied.

There seems to have been some difference in interpretation of records from Belfast. Although Belfast is a separate administrative unit now, it appears to have been referred to mostly as Co Antrim. However, in a number of cases the exact collecting site mentioned makes it clear that the record should be referred to Co Down instead. This is particularly the case for some records found in the list of Workman (1880). This has resulted in slight discrepancies between my final summarized distribution as given for each species and the earlier distributions published by Bristowe (1939) or Locket *et al.* (1974).

THE PRESENT CATALOGUE

For practical reasons I have not included all references in the the present catalogue but restricted myself to the main summarizing lists mentioned above. Only literature records clearly omitted from the period before Bristowe's *The*

comity of spiders (1939) have been added. I have tried to cover all the literature after 1939 in order to summarize and make available the original sources which served for the production of the distribution maps in Locket *et al.* (1974). The catalogue presented here now contains 397 species names, but this number is inclusive of nine exotic, imported species (marked by an asterisk *), found in hothouses (where they may have settled) or together with imported goods: *Hasarius adansoni*, *Heterothele* spec., *Latrodectus mactans*, *Olios sanctivincenti*, *Scodra* spec., *Torania variata*, *T. scutata*, *Triaeris stenaspis*, and *Zoropsis maculosa*. They are included here because they have been mentioned in the literature, but they do not (yet) belong to the indigenous Irish fauna. Also included are five *species incertae sedis* (*Erigone carinata*, *E. pallidula*, *Euryopis haematostigma*, *Linyphia nasata*, *Theridion auratum*), all Templeton "in manuscript" names referred to by Blackwall (1861, 1864); also three questionable records dating from the time of Blackwall (1861-1864) and Workman (1880) and never confirmed since (*Anelosimus aulicus*, *Haplodrassus ferrugineus*, *Theridion simile*); one species (*Zelotes subterraneus*) which recently was stated not to occur in Ireland despite earlier records; and one persistent mistake where the rectification of an earlier record was overlooked by a subsequent author so that an old error has been repeated (*Porrhomma microphthalmum*). The actual number of presently recorded indigenous Irish spider species is thus 378.

In the near future many new records will be published and new species for Ireland will be added to the list. With this catalogue it will be possible to trace the earlier records, if extant, and check the available ecological data and grid references. It is my opinion that in the future we should publish new records and other distribution data not as county records but refer to the grid positions as accurately as possible. Only then can the data be properly used nationally or on the European level without loss of detailed information.

Scytodes thoracica; Merrett, 1989: 1 (DUB); Higgins, 1990: 279 (DUB); McFerran *et al.*, 1993: 33 (Ireland).

Distribution: DUB.

PHOLCIDAE

Pholcus phalangioides (Fuesslin, 1775)

Pholcus phalangioides; Carpenter, 1898: 155 (COR, KER, LIM, WAT); Bristowe, 1939: 16 (CLA, COR, KER, KLK, LIM, TIP, WAT, WEX); Mackie, 1972: 237 (COR); Locket *et al.*, 1974: 140 (CLA, COR, KER, KLK, LIM, TIP, WAT, WEX); Merrett, 1979: 371, 372 (CLA, COR, KER, KLK, LIM, TIP, WAT, WEX); Merrett, 1982: 332 (DUB); McFerran *et al.*, 1993: 34 (Ireland).
Distribution: CLA, COR, DUB, KER, KLK, LIM, TIP, WAT, WEX.

Psilochorus simoni (Berland, 1911)

Psilochorus simoni; Fürst *et al.*, 1993: 77 (Northern Ireland).
Distribution: Northern Ireland.

GNAPHOSIDAE

Drassodes cupreus (Blackwall, 1834)
(? = *Drassodes lapidosus*)

Drassodes cupreus; Blackwall, 1861: 114 (Ireland); Carpenter, 1898: 138 (ANT, COR, DON, DUB (Lambay Isl.), GAL (Aran Isl., M'Dara Isl.), KER, MAY, WIC); Pack-Beresford, 1909: 105 (= *D. lapidosus*); Locket *et al.*, 1974: 140 (KER); Snazell, 1984: 16 (CLA, DUB, MAY); Merrett, 1989: 2 (ANT); McFerran *et al.*, 1993: 34 (Ireland).

Drassus cupreus; Workman, 1880b: 127 (Ireland).

Drassodes lapidosus var. *cupreus*; Locket *et al.*, 1951: 101 (Ireland).

Distribution: ANT, CLA, COR, DON, DUB, GAL, KER, MAY, WIC.

See also remarks under *Drassodes lapidosus*.

Drassodes lapidosus (Walckenaer, 1802)

Drassus lapidicolens; Workman, 1880b: 127 (Ireland).

Drassodes lapidosus; Carpenter, 1898: 137 (DUB); Bristowe, 1939: 17 (ANT, CAR, CLA, COR, DON, DOW, DUB (Lambay Isl.), GAL, KER, LOU, MAY, ROS, SLI, TIP, WAT, WIC, W. Distribution: ANT, CAR, CLA, COR, DON, DOW, DUB, GAL, KER, LOU, MAY, ROS, SLI, TIP, WAT, WIC.

Despite the many records by Bristowe (1939: 17), Locket *et al.* (1974: 140) do not indicate any Irish record on the map of *D. lapidosus* (map 31) and only one on that of *D. cupreus* (map 32). Here we have the well-known dilemma: two species the identification of which proved to be difficult in the past and thus leave us with a number of uncertain records.

Distribution: CAR, DUB, LAO, TIP, WIC.

Zelotes apricorum (L. Koch, 1876)

Prothesima petiverii; Workman, 1880b: 127 (DUB).
Prothesima subterranea; Carpenter, 1898: 136 (WIC); Pack-Beresford, 1909: 107 (DUB, FER, WAT).
Zelotes apricorum; Bristowe, 1939: 19 (DOW, DUB (Lambay Isl.), FER, GAL, MAY, TIP, WAT, WIC); Mackie *et al.*, 1970: 337 (CLA); Locket *et al.*, 1974: 144 (CLA, DOW, DUB, FER, GAL, MAY, TIP, WAT, WIC); Murphy & Platnick, 1986: 100 (CLA); Merrett, 1989: 2 (CLA); McFerran *et al.*, 1993: 34 (Ireland).
Distribution (confirmed): CLA.

The references above are probably partly invalidated by recent research (Murphy & Platnick, 1986) with the exception of Clare Co., the only county the occurrence of *Z. apricorum* could be confirmed for. This species has often been confused with *Z. subterraneus*.

Zelotes electus (C.L. Koch, 1839)

Zelotes electus; Mackie *et al.*, 1970: 336 (KER); Locket *et al.*, 1974: 144 (KER (coast)); McFerran *et al.*, 1993: 34 (Ireland).
Distribution: KER (coast).

Zelotes latreillei (Simon, 1878)

Prothesima latreillei; Carpenter, 1898: 137 (ANT, CLA, COR, DOW, KER, LIM, LOU, WAT).
Zelotes latreillei; Bristowe, 1939: 19 (ANT, CAR, CLA, COR, DOW, FER, KER, LIM, LOU, MAY, WAT, WEX); Wanless, 1965: 45 (WIC); Merrett, 1967: 5 (WIC); Mackie *et al.*, 1970: 337 (CLA); Mackie, 1972: 236, 237 (COR, KER); Locket *et al.*, 1974: 144 (ANT, CAR, CLA, COR, DOW, FER, KER, LIM, LOU, MAY, WAT, WEX, WIC); McFerran *et al.*, 1993: 34 (Ireland).
Distribution: ANT, CAR, CLA, COR, DOW, FER, KER, LIM, LOU, MAY, WAT, WEX, WIC.

Zelotes longipes (L. Koch, 1866)

Zelotes serotinus; Carpenter, 1898: 136 (CLA, GAL (Aran Isl.)); Bristowe, 1939: 19 (CLA, GAL (Aran Isl.)); Locket *et al.*, 1974: 145 (CLA); McFerran *et al.*, 1993: 34 (Ireland).
Distribution: CLA, GAL.

? Zelotes subterraneus (C.L. Koch, 1833)

Distribution: not in Ireland.

Former references (see under *Z. apricorum*) are invalidated by recent research by Murphy & Platnick (1986), who could not confirm the occurrence of *Z. subterraneus* in Ireland. This species for a long time has been confounded with *Z. apricorum*.

Metellina segmentata (Clerck, 1757)

Epeira inclinata; Blackwall, 1864: 354 (Ireland).

Meta segmentata; Workman, 1880b: 129 (Ireland); Carpenter, 1898: 189 (Ireland); Richards, 1961: 5 (CLA); Wanless, 1965: 45 (WIC); Mackie *et al.*, 1970: 337 (CLA); Kennedy *et al.*, 1972: 35 (COR); Mackie, 1972: 236 (KER); Bailey, 1974: 421 (WIC); Locket *et al.*, 1974: 207 (CLA, DUB, KER); Moore, 1976: 7 (CLA); Curry, 1976a: 28 (DUB); Sleeman, 1981: 154 (WIC); Merrett, 1982: 334 (GAL); Merrett, 1989: 3 (MAY); McFerran *et al.*, 1993: 39 (Ireland); Merrett, 1995: 17 (FER, SLI).

Meta reticulata; Bristowe, 1939: 51 (ANT, ARM, CAR, CAV, CLA, COR, DON, DOW, DUB (Lambay Isl.), FER, GAL, KER, KLD, KLK, LAO, LIM, LND, MAY, MEA, MON, ROS, SLI, TIP, TYR, WAT, WES, WEX, WIC, W. Isl.).

Distribution: CLA, COR, DUB, FER, GAL, KER, MAY, SLI, WIC.

Bristowe (1939) did not distinguish between *Meta segmentata* and *M. mengei*. Locket *et al.* (1974), not knowing which species had been recorded by Bristowe, probably left out all those records on purpose, a policy I have followed here too.

TETRAGNATHIDAE

Pachygnatha clercki Sundevall, 1823

Pachygnatha clercki; Workman, 1880b: 128 (ANT, DOW); Carpenter, 1898: 187 (DOW, GAL, KER, KLD, LND, SLI); Bristowe, 1939: 51 (ANT, ARM, CAR, CAV, CLA, COR, DON, DOW, DUB, FER, GAL, KER, KLD, KLK, LAO, LEI, LIM, LND, LOU, MAY (Clare Isl.), MEA, MON, OFF, ROS, SLI, TIP, WAT, WES, WEX, WIC, W. Distribution: ANT, ARM, CAR, CLA, COR, DON, DOW, DUB, FER, GAL, KER, KLD, KLK, LAO, LEI, LIM, LND, LNF, LOU, MAY, OFF, ROS, SLI, TIP, TYR, WAT, WES, WEX, WIC.

Tetragnatha montana Simon, 1874

Tetragnatha solandrii; Carpenter, 1898: 188 (COR, DUB, KER, LND, SLI, WIC).

Tetragnatha montana; Bristowe, 1939: 50 (ANT, CAR, COR, DUB, FER, KER, KLK, LAO, LND, MAY, ROS, SLI, TIP, WAT, WES, WEX, WIC); Mackie,

1963: 117 (DON); Merrett, 1964c: 6 (DON); Wanless, 1965: 45 (COR); Mackie *et al.*, 1970: 337 (CLA); Mackie, 1972: 237 (COR, LAO, TIP); Locket *et al.*, 1974: 206 (ANT, CAR, CLA, COR, DON, DUB, FER, KER, KLK, LAO, LND, MAY, ROS, SLI, TIP, WAT, WES, WEX, WIC); Snazell, 1984: 16 (KLD); McFerran *et al.*, 1993: 39 (Ireland).

Distribution: ANT, CAR, CLA, COR, DON, DUB, FER, KER, KLD, KLK, LAO, LND, MAY, ROS, SLI, TIP, WAT, WES, WEX, WIC.

Tetragnatha nigrita Lendl, 1886

Tetragnatha nigrita; Carpenter, 1898: 189 (WES); Bristowe, 1939: 50 (KLK, ROS, WES); Locket *et al.*, 1953: 104 (Ireland); Locket *et al.*, 1974: 206 (KLK, ROS, WES); Merrett, 1989: 3 (FER); Cowden *et al.*, 1990: 323 (FER); McFerran *et al.*, 1993: 39 (Ireland).

Distribution: FER, KLK, ROS, WES.

Tetragnatha obtusa C.L. Koch, 1837

Tetragnatha obtusa; Carpenter, 1898: 188 (COR, DUB, GAL, WES); Bristowe, 1939: 50 (CLA, COR, DUB, GAL, KER, LAO, TIP, WAT, WES, WEX); Locket *et al.*, 1953: 104 (Ireland); Locket *et al.*, 1974: 206 (CLA, COR, DUB, GAL, KER, LAO, TIP, WAT, WES, WEX); Merrett, 1989: 3 (FER); Cowden *et al.*, 1990: 323 (FER); McFerran *et al.*, 1993: 39 (Ireland).

Distribution: CLA, COR, DUB, FER, GAL, KER, LAO, TIP, WAT, WES, WEX.

Tetragnatha pinicola L. Koch, 1870

Tetragnatha pinicola; Pack-Beresford, 1909: 103 (KER); Bristowe, 1939: 51 (KER); Locket *et al.*, 1953: 102 (Ireland); Merrett, 1964c: 6 (KER); Locket *et al.*, 1974: 125; Merrett, 1982: 334 (CLA); McFerran *et al.*, 1993: 39 (Ireland).

Distribution: CLA, KER.

According to Locket, Millidge & Merrett (1974: 125) many of the older records of this species were uncertain; this made its occurrence in Ireland equally uncertain and the distribution map of the species remained blank for Ireland in consequence.

Tetragnatha striata L. Koch, 1862

Eugnatha striata; Pack-Beresford, 1909: 103 (SLI); Pack-Beresford, 1929: 48; Bristowe, 1939: 51 (GAL, SLI); Locket *et al.*, 1953: 106 (Ireland).

Tetragnatha striata; Locket *et al.*, 1974: 206 (GAL, SLI); McFerran *et al.*, 1993: 39 (Ireland).

Distribution: GAL, SLI.

ARANEIDAE

Agalenatea redii (Scopoli, 1763)

Araneus redii; Carpenter, 1898: 194 (COR, KER, LIM, ROS); Wanless, 1965: 45 (COR); Mackie *et al.*, 1970: 337 (GAL); Locket *et al.*, 1974: 212 (CAR, CLA, COR, GAL, KER, LIM, ROS, WAT, WEX).

Epeira redii; Pack-Beresford, 1909: 116 (CAR, COR, KER, WAT, WEX).

Aranea redi; Bristowe, 1939: 55 (CAR, CLA, COR, KER, LIM, ROS, WAT, WEX).

Agalenatea redii; McFerran *et al.*, 1993: 39 (Ireland); Merrett, 1995: 17 (DOW).

Distribution: CAR, CLA, COR, DOW, GAL, KER, LIM, ROS, WAT, WEX.

Araneus diadematus Clerck, 1757

Epeira diadema; Blackwall, 1864: 358 (Ireland).

Epeira diademata; Workman, 1880b: 129 (Ireland); Cambridge, 1881: 266 (Ireland).

Araneus diadematus; Carpenter, 1898: 192 (Ireland); Richards, 1961: 5 (CLA); Mackie, 1963: 117 (DON); Merrett, 1964c: 6 (LEI, LNF); Wanless, 1965: 45 (COR, WIC); Mackie *et al.*, 1970: 337 (CLA, GAL); Locket *et al.*, 1974: 209 (ANT, ARM, CAR, CAV, CLA, COR, DON, DOW, DUB, FER, GAL, KER, KLD, KLK, LAO, LEI, LIM, LND, LNF, LOU, MAY, MEA, OFF, ROS, SLI, TIP, TYR, WAT, WES, WEX, WIC, W. Distribution: ANT, ARM, CAR, CAV, CLA, COR, DON, DOW, DUB, FER, GAL, KER, KLD, KLK, LAO, LEI, LIM, LND, LNF, LOU, MAY, MEA, OFF, ROS, SLI, TIP, TYR, WAT, WES, WEX, WIC.

Araneus quadratus Clerck, 1757

Epeira quadrata; Workman, 1880b: 129 (KER).

Araneus quadratus; Carpenter, 1898: 194 (CLA, COR, DON, GAL, KER, KLK, LAO, LIM, LOU, OFF, ROS, WIC); Wanless, 1965: 45 (WIC); Parker, 1967: 330 (DOW); Bailey, 1974: 421 (KLD); Locket *et al.*, 1974: 210 (CAR, CLA, COR, DON, DUB, GAL, KER, KLD, KLK, LAO, LIM, LOU, MAY, OFF, ROS, SLI, TYR, WAT, WIC); Healy, 1975: 231 (DUB); Higgins, 1985: 95 (OFF); McFerran *et al.*, 1993: 39 (Ireland).

Aranea reaumuri; Bristowe, 1939: 56 (CAR, CLA, COR, DON, DUB, GAL, KER, KLK, LAO, LIM, LOU, MAY, OFF, ROS, SLI, TYR, WAT, WIC).

Distribution: CAR, CLA, COR, DON, DOW, DUB, GAL, KER, KLD, KLK, LAO, LIM, LOU, MAY, OFF, ROS, SLI, TYR, WAT, WIC.

Araniella cucurbitina (Clerck, 1757)

Epeira cucurbitina; Blackwall, 1864: 342 (Ireland); Workman, 1880b: 129 (ANT).

Araneus cucurbitinus; Carpenter, 1898: 192 (COR, DON, GAL, KER, LIM, LND); Mackie *et al.*, 1970: 338 (TIP); Bailey, 1972: 281 (WES); Locket *et al.*, 1974: 213 (ANT, CAR, CAV, CLA, COR, DON, DUB, GAL, KER, LAO, LIM, LND, MEA, TIP, WAT, WES, WEX, WIC); Merrett, 1989: 3 (FER).

Aranea cucurbitina; Bristowe, 1939: 54 (ANT, CAR, CAV, COR, DON, DUB, GAL, KER, LAO, LIM, LND, MEA, TIP, WAT, WEX, WIC).

Araniella cucurbitina; Cowden *et al.*, 1990: 323 (FER); McFerran *et al.*, 1993: 40 (Ireland); Merrett, 1995: 17 (KLD).

Distribution: ANT, CAR, CAV, CLA, COR, DON, DUB, FER, GAL, KER, KLD, LAO, LIM, LND, MEA, TIP, WAT, WES, WEX, WIC.

Araniella opistographa (Kulczynski, 1905)

Araneus cucurbitinus var. *opistographus*; Greaves, 1966: 154 (DOW).

Araneus opistographus; Bailey, 1974: 421 (WIC); Locket *et al.*, 1974: 126, 213 (CLA, ROS, WIC); Merrett, 1982: 334 (KLD).

Araniella opistographa; McFerran *et al.*, 1993: 40 (Ireland); Merrett, 1995: 17 (ARM, FER; delete KLD).

Distribution: ARM, CLA, DOW, FER, ROS, WIC.

Atea triguttata (Fabricius, 1775)

Atea triguttata; McFerran *et al.*, 1993: 40 (Ireland).

Cyclosa conica (Pallas, 1772)

Cyclosa conica; Carpenter, 1898: 190 (GAL); Pack-Beresford, 1909: 116 (CAR, COR, KER, WAT, WEX); Bristowe, 1939: 52 (CAR, CLA, COR, GAL, KER, LAO, TIP, WAT, WEX, WIC); Wanless *et al.*, 1968: 9 (COR); Locket *et al.*, 1974: 217 (CAR, CLA, COR, GAL, KER, LAO, TIP, WAT, WEX, WIC); McFerran *et al.*, 1993: 40 (Ireland).

Distribution: CAR, CLA, COR, GAL, KER, LAO, TIP, WAT, WEX, WIC.

Gibbaranea gibbosa (Walckenaer, 1802)

Araneus gibbosus; Carpenter, 1898: 193 (ROS); Locket *et al.*, 1974: 209 (CAR, COR, GAL, LAO, ROS, WES, WEX); Snazell, 1984: 16 (KLD).

Epeira gibbosa; Pack-Beresford, 1909: 116 (CAR, COR, LAO, WEX).

Aranea gibbosa; Bristowe, 1939: 53 (CAR, COR, LAO, OFF, ROS, WES, WEX).

Gibbaranea gibbosa; McFerran *et al.*, 1993: 39 (Ireland); Merrett, 1995: 17 (ARM, FER).

Distribution: ARM, CAR, COR, FER, GAL, KLD, LAO, OFF, ROS, WES, WEX.

Hypsosinga pygmaea (Sundevall, 1832)

Singa pygmaea; Carpenter, 1898: 190 (OFF); Pack-Beresford, 1909: 116 (KER); Bristowe, 1939: 53 (KER, MAY, OFF); Locket *et al.*, 1953: 155 (Ireland); Mackie *et al.*, 1970: 336 (KER).

Larinioides cornutus; McFerran *et al.*, 1993: 39 (Ireland); Merrett, 1995: 17 (SLI).

Distribution: ANT, ARM, CAR, CAV, CLA, COR, DON, DOW, DUB, FER, GAL, KER, KLD, LEI, LIM, LNF, LOU, MAY, OFF, ROS, SLI, TIP, WAT, WES, WEX, WIC.

Larinioides patagiatus (Clerck, 1757)

Araneus patagiatus; Carpenter, 1898: 193 (DON, GAL, WES); Locket *et al.*, 1953: 136 (Ireland); Locket *et al.*, 1974: 211 (ANT, CLA, DON, GAL, ROS, TIP).

Aranea dumetorum; Bristowe, 1939: 56 (ANT, DON, GAL, ROS, TIP).

Larinioides patagiatus; McFerran *et al.*, 1993: 39 (Ireland).

Distribution: ANT, CLA, DON, GAL, ROS, TIP, WES.

Larinioides sericatus (Clerck, 1757)

Larinioides sclopetarius; Taylor, 1986: 8 (ANT); McFerran *et al.*, 1993: 39 (Ireland); Merrett, 1995: 17 (LND).

Araneus sclopetarius; Merrett, 1989: 3 (ANT).

Distribution: ANT, LND.

Mangora acalypha (Walckenaer, 1802)

Mangora acalypha; Pack-Beresford, 1909: 103 (KER); Bristowe, 1939: 57 (KER); Locket *et al.*, 1953: 166 (Ireland); Wanless, 1965: 45 (COR); Merrett, 1967: 5 (COR); Mackie, 1972: 237 (COR); Locket *et al.*, 1974: 217 (COR, KER); McFerran *et al.*, 1993: 40 (Ireland).

Distribution: COR, KER.

Neoscona adianta (Walckenaer, 1802)

Epeire adianta; Pack-Beresford, 1909: 103 (WAT); Pack-Beresford, 1929: 48 (COR, WAT).

Aranea adianta; Bristowe, 1939: 57 (COR, WAT).

Araneus adiantus; Locket *et al.*, 1953: 141 (Ireland); Locket *et al.*, 1974: 212 (COR, WAT).

Neoscona adianta; McFerran *et al.*, 1993: 40 (Ireland).

Distribution: COR, WAT.

Nuctenea umbratica (Clerck, 1757)

Araneus umbraticus; Carpenter, 1898: 194 (CAR, KER); Walton, 1965: 22 (COR); Locket *et al.*, 1974: 212 (CAR, KER, KLD, LAO).

Aranea sexpunctata; Bristowe, 1939: 56 (CAR, KER, KLD, LAO).

Nuctenea umbratica; McFerran *et al.*, 1993: 39 (Ireland); Merrett, 1995: 17 (SLI).

Distribution: CAR, COR, KER, KLD, LAO, SLI.

Zygiella atrica (C.L. Koch, 1845)

Epeira calophylla; Blackwall, 1864: 338 (Ireland).

Zilla atrica; Workman, 1880b: 129 (ANT); Carpenter, 1898: 191 (ANT, ARM, CAV, DON, DUB, GAL, KER, LND, LOU, ROS).

Zygiella atrica; Bristowe, 1939: 57 (ANT, ARM, CAR, CAV, CLA, COR, DON, DOW, DUB, GAL, KER, KLD, LND, LOU, MAY, ROS, TIP, TYR, WES, WEX, WIC); Wanless, 1965: 45 (COR, WIC); Finlay, 1966: 7 (GAL); Mackie, 1972: 237 (COR); Locket *et al.*, 1974: 216 (ANT, ARM, CAR, CAV, CLA, COR, DON, DOW, DUB, GAL, KER, KLD, LND, LOU, MAY, ROS, TIP, TYR, WES, WEX, WIC); McFerran *et al.*, 1993: 39 (Ireland); Merrett, 1995: 17 (SLI).

Distribution: ANT, ARM, CAR, CAV, CLA, COR, DON, DOW, DUB, GAL, KER, KLD, LND, LOU, MAY, ROS, TIP, TYR, WES, WEX, WIC.

Zygiella x-notata (Clerck, 1757)

Zilla x-notata; Workman, 1880b: 129 (Ireland); Carpenter, 1898: 191 (ANT, ARM, DUB, GAL (Aran Isl.), LIM, LOU, WIC).

Zygiella litterata; Bristowe, 1939: 57 (ANT, ARM, CAR, CLA, COR, DON, DOW, DUB, GAL, KER, KLD, KLK, LIM, LOU, MAY, TIP, WAT, WES, WEX, WIC, W. Isl.).
